MRO NITTA BELT KITS

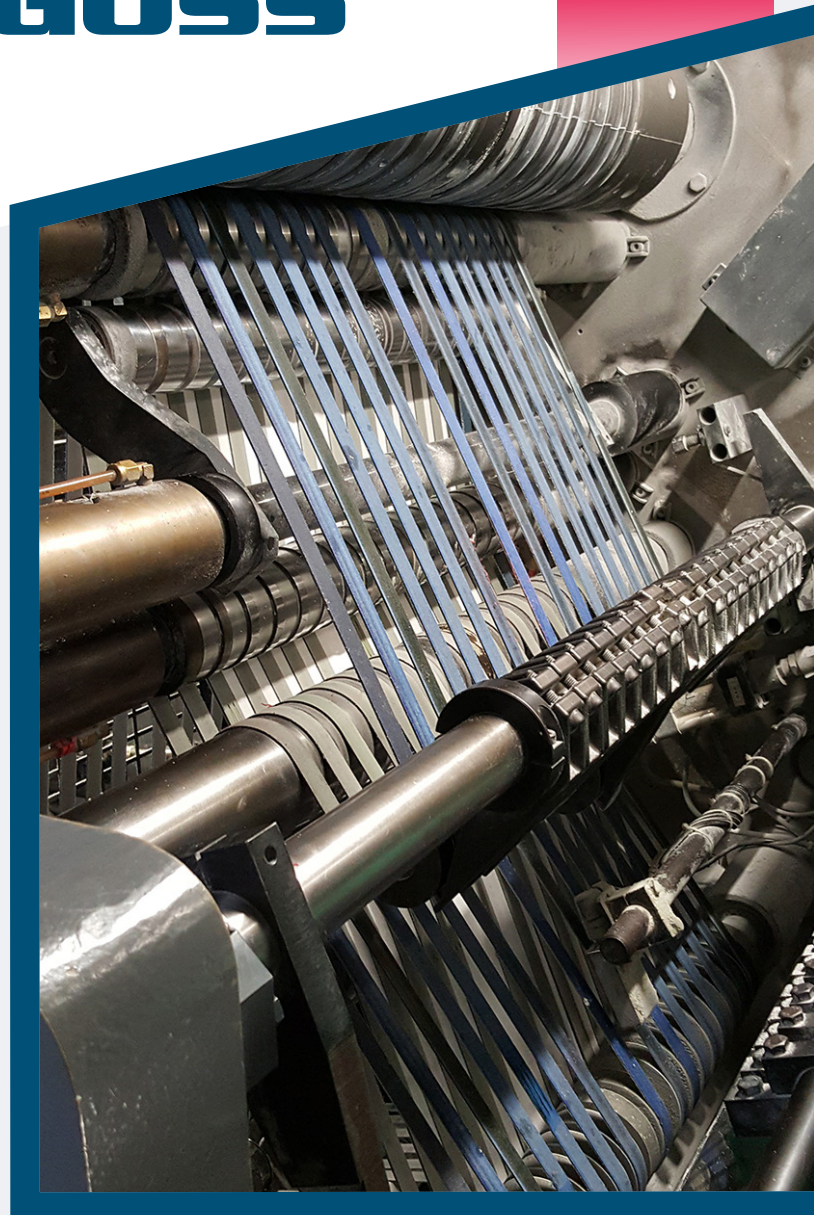

PERFORMANCE IMPROVEMENT

manroland Goss and Nitta Corporation are pleased to announce their collaboration in developing MRO Belt Kits for the high-speed sections on manroland Goss PCF-1, PCF-3, SG-3, and the new JF80G Folders.

Additional belt kits for more folders will be released in the future.

BENEFITS:

- Allows Folder to maintain constant speeds
- Maintains control of book
- Consistent designed tension
- Improved resistance to edge fraying
- High surface durability
- Greater abrasion resistance than competitive products
- Free splice training from Nitta's belting group

Specifications, features and dimensions are subject to availability along with change without prior notice
