## OMNICON AND OMNIColor PC UPGRADE

### COMPUTER HARDWARE AND SOFTWARE ENHANCEMENT

manroland Goss now offers a control system PC upgrade solution for presses with Omnicon and/or Omnicolor. In many cases, the original PCs contain obsolete components which can no longer be replaced. This upgrade will protect your press against future component failure, as well as improve its performance and uptime.

#### **BENEFITS:**

- New computer hardware addresses obsolescence concerns
- Faster processors boost HMI responsiveness
- Expanded memory and storage capacity
- Modern USB touch screen, with articulating swing arm assembly
- VPN connectivity for improved remote support capabilities
- Installation by a trained manroland Goss technician

#### **APPLICATIONS:**

- Omnicon or HWDC press system computers, including the servers, operator consoles, and Omnicolor consoles

Specifications, features and dimensions are subject to availability along with change without prior notice
