## S4000 LOWER AUTOPLATE LIFT RETROFIT

### RODLESS AIR CYLINDER OBSOLESCENCE

manroland Goss is pleased to introduce a replacement for the obsolete S4000 Autoplate Lower Lift Cylinder.

#### BENEFITS:

- Eliminates need to rebuild existing cylinders that are obsolete
- Is a "Plug & Play" replacement
- No changes needed to existing electrical, mechanical or mountings
- Uses standard tubular air cylinder, eliminating the problems with the rodless cylinder
- Utilizes lube free bearings so does not require maintenance
- Is available for all cutoffs on the S4000

#### APPLICATIONS:

- **S4000** units with Autoplate shipped from 2002 to 2011

#### REQUIREMENTS:

- First unit installed by a manroland Goss trained service technician. Following unit possibly installed by customer maintenance technician.
- Can be updated one unit at the time for a minimal invest and down time

Specifications, features and dimensions are subject to availability along with change without prior notice
