

FOLDER SPIDER REMANUFACTURE

DESCRIPTION

The spider is a vital part of the folding cylinder, but like any moving mechanism, it may wear out as your press ages. A manroland Goss rebuilt spider will perform like a new one, because the same parts, technology and settings are used to build new folders.

Manroland Goss spiders are dynamically balanced and all gear backlashes are set and readjusted before they leave the factory. Only the best sealing technologies are employed to ensure that your spider has no oil leaks and performs to its original specifications.

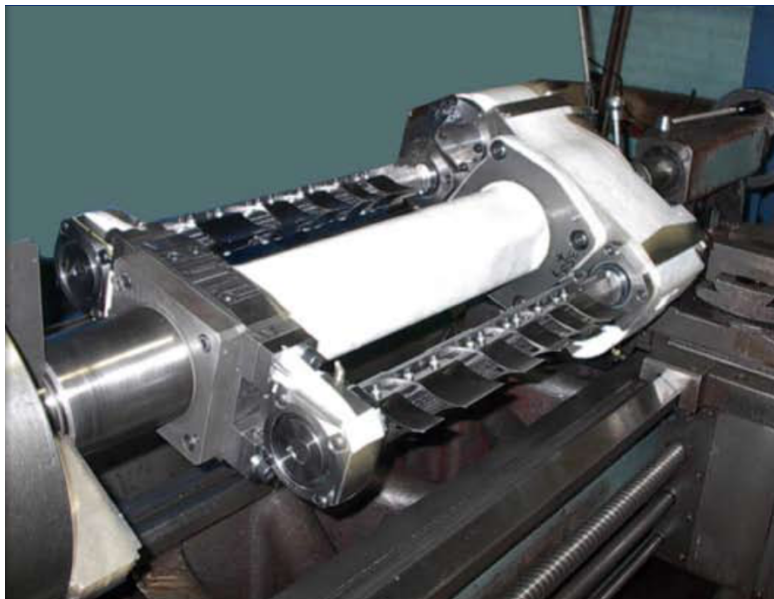

The manroland Goss rebuild process ensures long life and offers excellent operational results.

APPLICATION

3:2 Rotary Folders, Imperial 144-page, Sovereign 160-page, others upon inquiry.

BENEFITS

- Eliminates inconsistent folds
- Higher Newspaper quality overall
- More reliability

Specifications, features and dimensions are subject to availability along with change without prior notice
